Bring all water to a boil, let it boil for one minute and let it cool before using, or use bottled water. Boiled or bottled water should be used for drinking, making ice, brushing teeth, washing dishes and food preparation until further notice. Boiling kills bacteria and other organisms that may be in the water.

Customers will be notified when you no longer need to boil your water.

For more information, please contact Robert Bennett, Director of Public Services at 797-3031 or the Johnson City Water Department at 797-2523.

This notice is being sent to you by the Johnson City Water Department, State Water System ID#: NY0301668.
