JOHNSON CITY – HYDRANT FLUSHING

The Village of Johnson City Water Department will be flushing hydrants daily starting today in the following areas:

Jay Street to Ukrainian Hill Road

From Harry L Drive to Leigh Street

This process is due to ongoing construction in the area which is necessary to ensure the proper operation of the hydrants and to flush the water system to remove any sediment that may be present within the water mains.

During the flushing operations you may experience fluctuations in pressure and/or discolored water. The condition is temporary and does not pose a health hazard. If you experience discolored water, run your **cold** water tap until it clears up. During periods of discoloration postpone washing clothes and limit your use of hot water until the cold water clears.

For more information, contact the Johnson City Water Department at 607-797-2523.
